-  Vernon Roque
-  github.com/vernonroque818 (for work)
-  github.com/vernonroque (personal)
-  +1-818-531-8729

SKILLS SUMMARY

- Front-end technologies: HTML, CSS, Tailwind CSS, JQuery, Javascript, Terminal/Unix for MacOS, Git, node, APIs, Google Cloud Functions, Test Driven Development
- Front-end frameworks: React/Redux, Flutter
- Back-end technologies: Node.js, Express.js, SQL, PostgreSQL, PHP, Python, Django, Test Driven Development

NOTABLE PROJECTS

- **Automated Cleaners Payroll:** Made a script that automates cleaners' payroll and automatically generates an email that is ready to send
- **Reservation Calendar:** Tracks the reservations for properties and allows the company to price in groups based on weekdays, weekends, months, holidays, and events
- **Amazon Clone Project:** Made a simple imitation of the e-commerce site Amazon. This is a fullstack application.
- **Receipt Parser API:** Made an API that takes a .jpg, .png, or .pdf of a receipt or invoice and converts it into a json data structure

INTERESTING FACTS

- Went backpacking for a year in South America.
- I like to play jazz on my free time. I play the tenor saxophone :)

VERNON ROQUE

PERSONAL PROFILE

I am looking for opportunities in software development .

Here is a link to my developer portfolio:

<https://developer-portfolio-8cc0c.web.app/>

WORK EXPERIENCE

Fullstack Software Developer

Cadenza Property Management | Mar 2024 - Present

- I manage and add features to the admin software application that allows for easier tracking and manageability of housing and apartment properties. The application uses an MVC architecture.
- I make scripts to automate email reports, employee payroll, budget reports, and accounting reports
- Technologies used: javascript/jquery, html, css, node.js/express.js, AWS, Python, MySQL, Object Relational Mapping, Github, Docker Containers, Jira Work Board

Software Developer Intern

Gala | Jan 2024 - Mar 2024

- Byte application: Working on an application that takes a customers question or response, and uses AI to return a valid answer
- Technologies I used: React.js, Django, PHP, Flutter, Tailwind CSS

Freelance Web Developer

Purgace | Dec 2023 - Jan 2024

- Responsible for site design and functionality using wordpress, css, and javascript
- Responsible for API design using 3rd party platforms

English and Math Teacher

Freelance | Sep 2016 - Nov 2023

- Taught English and Math internationally

Systems Installation Engineer

Panasonic Avionics Corporation | Jan 2012 - Aug 2015 |

- Designed and developed Global Communication Systems and In-Flight Entertainment Systems interconnects to ensure proper interfacing with existing aircraft equipment
- Prepared engineering schematics with AutoCAD.
